Marcello Zanardelli

has completed the online course

Parallel programming with HALCON

on March 13, 2026

The course included the following topics:

- Introduction to parallel programming with HALCON.
- Familiarity with relevant terminology, options and methods regarding parallel programming with HALCON.
- Optimal utilization of HALCON's automatic operator parallelization (AOP).
- Knowledge of methods, design strategies, and best-practices for manual parallel programming with HALCON.
- Awareness of selected advanced topics and relevant resources for further information on parallel programming (in HDevelop and with code integration).
